Compleat

Compleat® Pediatric Original 1.0

Compleat® Pediatric Original 1.0 tube-feeding formula is specifically designed for children 1 to 13 years. It provides the nourishment you want for your little one with a variety of real fruit and vegetable ingredients like peas, tomato paste, green beans, peaches, carrots and cranberry juice concentrate. Compleat® Pediatric Original 1.0 can provide your child with the complete real-food nutrition they need.

Compleat® Original 1.0

Compleat® Original 1.0 formula is a nutritionally complete tube-feeding formula that includes a variety of real food ingredients, such as protein from milk, chicken and peas, as well as fruit and vegetable ingredients such as tomato paste, peaches, green beans, carrots and cranberry juice concentrate.

Compleat® Peptide 1.0

Compleat® Peptide 1.0 is a plant- and peptide-based tube feeding formula that's also suitable for drinking. With its nutrient-packed blend of fruit and vegetable ingredients, such as tomatoes, peaches, and carrots, and hydrolyzed pea protein that supports feeding tolerance, it's a great choice for tube-fed patients. Offering a vegan formula that's free from common food allergens, and GMO ingredients.

Compleat® Pediatric Peptide 1.0

Compleat® Pediatric Peptide 1.0 is a plant- and peptide-based tube feeding formula flavored for drinking and is specifically formulated to provide complete nutrition for children ages 1 to 13 years. Compleat® Pediatric Peptide 1.0 is made with fruit and vegetable ingredients such as tomatoes, peaches, and carrots, in addition to hydrolyzed pea protein to support tolerance. Compleat® Pediatric Peptide 1.0 is vegan.

Compleat® Pediatric Original Reduced Calorie

With 40% fewer calories than Compleat® Pediatric Original 1.0, Compleat® Pediatric Original Reduced Calorie 0.6 formula is specially formulated for children 1 to 13 years with reduced caloric needs.

EleCare

EleCare (Infant)

A nutritionally complete amino acid-based formula for infants with food allergies or GI conditions. It's hypoallergenic and clinically shown to support the growth of exclusively formula-fed infants. The protein source is comprised of 100% free amino acids and has DHA/ARA to help support brain and eye development.

EleCare Junior

Designed to meet the nutritional needs of children ages 1 year and older who cannot tolerate milk, soy, or protein hydrolysate formulas. The amino acid-based, hypoallergenic formula is clinically shown to be effective for maintaining growth in children with severe food allergies and cow's milk allergy when used as a primary source of calories. Plus, EleCare Jr Unflavored meets or exceeds 100% of the Dietary Reference Intakes (DRIs) for protein and 25 essential vitamins and minerals for children ages 1 to 13.

Ensure

Ensure[®] Original

For every day health. Each bottle of Ensure Original provides complete balanced nutrition with 9 grams of high quality protein, 27 essential vitamins and minerals, including antioxidants, and 25% of the daily value of B vitamins. GLUTEN-FREE.

Ensure[®] Plus

Used to help gain or maintain a healthy weight with nutrients to support immune health. Each bottle of Ensure Plus provides the same complete balanced nutrition as the Original formula with 75% more protein (16 grams per bottle). GLUTEN-FREE

Ensure[®] Clear

A fat-free, refreshing fruit-flavored nutrition drink. Helps cover nutritional gaps. Contains 8 grams of high quality protein and 15 essential vitamins and minerals. GLUTEN-FREE. SUTABLE FOR LACTOSE INTOLERANCE

Functional Formularies

Nourish Pediatric Formula

Nourish is an organic, plant-based, whole foods feeding tube formula and oral meal replacement optimized for children. Formulated to help maintain healthy weight and provide complete nutrition. A nutritionally dense, real, whole food meal replacement and enteral formula.

Nourish PEPTIDE Pediatric Formula

The first organic, whole food, plant-based peptide feeding tube formula. Nourish plus organic pea peptides and organic coconut MCT oil for enhanced digestion.

Liquid Hope Adult Formula

The world's first shelf-stable, organic, whole foods feeding tube formula and oral meal replacement. A nutritionally dense, complete source of nutrition packed with 16 whole food ingredients rich in polyphenols and phytonutrients with no added sugar or artificial ingredients. Liquid Hope is perfect for those desiring to increase their daily consumption of organic vegetables and nutrients.

Liquid Hope PEPTIDE Adult Formula

Made from original Liquid Hope with the addition of organic hydrolyzed pea peptide protein and organic coconut MCT oil. Contains 500 calories from 19 Certified Organic, whole food, plant-based ingredients. Formulated to support enhanced digestion and maximum nourishment.

Kate Farms

Kate Farms® Standard

A sole-source nutrition shake designed for a range of needs. This plant-based shake is made with organic pea protein and 27 vitamins and minerals, and it's made without common allergens or artificial flavors and colors.

Kate Farms® Pediatric Standard 1.2

Designed for children ages 1 - 13. It contains a unique blend of organic plant-based protein derived from yellow peas, prebiotic fiber, and carbohydrates to help support healthy growth and development. Designed to taste great and made with 12 g of organic protein, this nutritionally complete shake can be used as a meal replacement or enjoyed as a snack.

Kate Farms® Peptide

Designed for easy digestion and made with hydrolyzed organic pea protein. A unique blend of hydrolyzed protein, prebiotic fiber, and carbohydrates to provide high-quality nutrition. It's designed for both tube feeding and drinking and flows smoothly through tubes as small as 6.5 Fr without needing to be diluted with water.

Kate Farms® Pediatric Peptide

Designed for easy digestion, Kate Farms Pediatric Peptide contains 9 g of hydrolyzed organic pea protein. Thoughtfully prepared with high-quality ingredients. A sole-source nutrition option for tube feeding or drinking, provides 27 vitamins and minerals, and is made without common allergens.

Neocate

Neocate® Infant

Specially formulated for the dietary management of infants with cow milk allergy (CMA), multiple food allergies (MFA), and related gastrointestinal (GI) and/or allergic conditions, including eosinophilic GI disorders (EGIDs), food protein-induced enterocolitis syndrome (FPIES), short bowel syndrome (SBS), malabsorption,* and gastroesophageal reflux (GER) related to food allergies.

Neocate® Junior

The first and only hypoallergenic formula that is available with prebiotic fiber to help support digestive health. Specially formulated for the dietary management of children with cow milk allergy (CMA), multiple food allergies (MFA) and related GI and allergic conditions, including eosinophilic esophagitis (EoE), food protein-induced enterocolitis syndrome (FPIES), short bowel syndrome (SBS), malabsorption and gastroesophageal reflux (GER).

Neocate® Splash

Neocate Splash is the first and only ready-to-feed hypoallergenic formula specifically designed to address the growing nutritional and lifestyle needs of toddlers, older children, and teens. Neocate Splash has a similar nutritional composition to Neocate® Junior and is ideal for oral and tube feeding. Neocate Splash is specially formulated for the dietary management of children with cow milk allergy (CMA), multiple food allergies (MFA), and related gastrointestinal and allergic conditions, including eosinophilic esophagitis (EoE), food protein-induced enterocolitis syndrome (FPIES), gastroesophageal reflux (GER), short bowel syndrome (SBS), and malabsorption.

Nutren

Nutren Junior®

Nutren Junior® is a whey protein-based pediatric formula that provides complete nutrition to help support nutritional requirements for children ages 1-13 who cannot consume adequate calories from regular foods. Contains 50% whey protein to support feeding tolerance. Gluten-free and suitable for lactose intolerance.

Nutren® 1.0 Fiber

NUTREN® 1.0 FIBER is a ready-to-use liquid tube feeding formula designed for individuals with normal protein and calorie needs. 14 grams of fiber per liter helps support digestive health and bowel function. Contains a high-quality casein and soy protein blend to help support lean body mass, and also contains taurine, carnitine and ultra-trace minerals for long-term feeding. Gluten-free and suitable for lactose intolerance.

Nutren® 2.0

Nutren® 2.0 is a ready-to-use liquid tube feeding formula is designed for individuals with limited fluid tolerance and increased energy needs. A calorically dense, complete nutrition tube feeding formula for those with elevated caloric requirements and/or a fluid restriction.

Orgain

Orgain[®] Vegan Organic Nutrition Shake

Crafted with real ingredients and powered by 16g of plant-based protein. Certified USDA Organic. Contains 21 vitamins and minerals. No artificial colors, flavors, sweeteners, or preservatives. Gluten Free. GMO Free.

Orgain[®] Kids Organic Nutrition Shake

A protein shake for kids containing 8g of organic, grass-fed protein and 22 essential vitamins & minerals. Made with organic fruit and veggie powder. Gluten-free. Non-GMO. No soy ingredients or artificial flavors.

Pedialyte

Pedialyte[®] Classic

Quickly replenishes lost fluids, zinc, and electrolytes to help prevent dehydration. Available in a variety of flavors or completely unflavored.

Pediasure

Pediasure[®] Grow and Gain

PediaSure Grow & Gain is clinically proven nutrition to help kids grow. Every great-tasting shake provides 7g of protein, 27 vitamins and minerals, and has nutrients for immune support. Non-GMO. Gluten-free. Suitable for lactose intolerance.

PediaSure[®] Grow & Gain with Fiber

PediaSure Grow & Gain with Fiber supports growth and a healthy digestive system, and has 7 key nutrients for immune support. All the same benefits as Pediasure Grow & Gain as well as 3g of fiber per shake.

PediaSure SideKicks[®]

Each shake is a source of 10g protein, 3g fiber, and 27 essential vitamins and minerals for kids who are missing key nutrients. Non-GMO. Gluten-free. Suitable for lactose intolerance.

PediaSure[®] Peptide

PEDIASURE Peptide is a nutritionally complete, peptide-based formula for the nutritional needs of children 1 to 13 years of age with malabsorption, maldigestion, and other GI conditions. For oral or tube feeding. For supplemental or sole-source nutrition. Use under medical supervision.

Peptamen

Peptamen® (and Peptamen 1.5)

Nutritionally-complete peptide-based formula designed to support tolerance and absorption in individuals with impaired GI function. 100% Whey Protein. High percentage of fat from MCT, which facilitates fat absorption and supports formula tolerance. For tube feeding or oral supplementation. Use under medical supervision.

Peptamen® Junior

For children ages 1-13 with GI impairment. Peptamen Junior is complete nutrition that's easy to absorb and digest. The ONLY peptide-based formula that features 100% whey protein, a high-quality protein that helps build and/or maintain muscle tissue.

Real Food Blends

Real Food Blends®

For adults and children with feeding tubes. Real Food Blends is the closest to a homemade blenderized diet. No dairy, nut, or soy ingredients. No added salt, sugar, coloring, or flavor.

Easy to use: can be administered with bolus, gravity, or pump feeding methods.

Available in eight flavors including:

- Quinoa, Kale, and Hemp,
- Eggs, Apples, and Oats
- Chicken, Carrots, and Brown Rice
- Salmon, Oats, and Squash
- Beef, Potatoes, and Spinach

Whole Story Meals

Whole Story Meals®

Whole food, powdered meals perfect for tube-feeding (enteral) and oral eaters alike.

Whole Story Meals is real fruits and vegetables picked at their peak of ripeness and freeze dried to preserve their natural nutrients, no artificial ingredients. The strategic formulation of real food arrives in a convenient, powdered form, ready to be rehydrated with the liquid of your choice.

Lightweight. Shelf-stable.

Available in two flavors:
Chicken, Peas, and Carrots
Kale, Quinoa, and Berries

Supplements: Additional Calories

Duocal®

A unique high energy product that can be added to foods and beverages without altering the taste or texture when more calories are needed in the diet. Specially formulated for the dietary management of conditions where a high-energy, low-fluid, low-electrolytes diet is indicated, protein-restricted diets, disorders of protein and amino acid metabolism, malabsorptive states, modular diets, and catabolic states (e.g. burns, trauma, post-operative stress).

Benecalorie®

Benecalorie® is a great way to enhance foods with more calories and protein. It is an unflavored protein & calorie supplement with vitamin C & E, to support nutritional goals. Highly concentrated source of calories and protein - 330 calories and 7 g high-quality protein per 1.5 fl oz serving (44 mL). Benecalorie® is easy to mix with food and drink - this unflavored calorie & protein supplement mixes with your favorite drinks, protein shakes, soft foods, or nutritional supplements.

Supplements: Fiber

Nutrisource® Fiber

NUTRISOURCE® Fiber powder is unflavored for mixing into your favorite beverage or meal without compromising taste while helping support digestive health and normal bowel function. Each serving of Nutrisource® Fiber powder provides 3 grams of soluble fiber from 100% partially hydrolyzed guar gum (PHGG) to help support digestive health and normal bowel function.

Benefiber® Original

Clear, taste-free Benefiber powder is plant-based prebiotic fiber that nourishes the good bacteria that exist naturally in your gut. Daily fiber powder that strengthens and nourishes good bacteria to support gut health using wheat dextrin. Gluten-free, sugar-free, grit-free.

Supplements: Protein

Premier Protein® Shakes

Packaged in a 11.5oz bottle, each Premier Protein Shake contains 30 grams of protein, complete with all the essential amino acids, 1g of sugar, 3-5g carbs (depending on flavor), 160 calories, 24 vitamins & minerals, and is also low in fat.

Beneprotein®

Contains 6 grams of high-quality whey protein in every scoop or single serve packet. This powder mixes into a wide variety of hot or cold foods and beverages and can be used to help increase the protein content of the diet. Contains no artificial flavors or sweeteners. Can be administered through a feeding tube as a flush.

Nutricia® Complete Amino Acid Mix

Complete Amino Acid Mix is a powdered mix of essential and non-essential amino acids. Complete Amino Acid Mix is specially formulated for use by individuals over the age of 1 year as a protein source when amino acids are required rather than whole protein or peptides. No artificial colors, flavors, sweeteners. Complete Amino Acid Mix is a specially formulated medical food and should only be used under medical supervision.

Juven® Therapeutic Nutrition Powder

Juven contains a unique blend of key ingredients to help support wound healing. Each packet mixes easily in 8-10 oz of water or juice and contains: HMB, Arginine, Glutamine, and collagen protein,, Includes micronutrients zinc and vitamins C, E, and B12.

Supplements: Vitamin and Mineral

NanoVM[®] t/f (GOLD)

A soluble, hypoallergenic, ketogenic-friendly vitamin and mineral supplement powder designed for tube feedings. This dispersible powder is intended for use with formulas that do not provide adequate vitamin and mineral requirements, low-energy requirements, and normal-for-age micronutrient requirements, as well as fluid restrictions. Complete with 14 vitamins, 13 minerals, plus Choline.

NanoVM[®] 4-8 (BLUE)

A powdered, hypoallergenic, ketogenic-friendly vitamin and mineral dietary supplement designed specifically for children 4-8 years of age with food allergies or who require a carbohydrate restriction. Complete with 14 vitamins, 13 minerals, plus Choline.

NanoVM[®] 9-18 (SILVER)

A powdered, hypoallergenic, ketogenic-friendly vitamin and mineral dietary supplement designed specifically for children 9-18 years of age with food allergies or who require a carbohydrate restriction. Complete with 14 vitamins, 13 minerals, plus Choline.

NanoVM[®] Adult (GREEN)

A powdered, hypoallergenic, ketogenic-friendly vitamin and mineral supplement is designed specifically for adults ages 19-70 with multiple food allergies. Complete with 13 vitamins and 13 minerals.

Supplements: Fat

Liquigen[®]

A medical food, high energy medium chain triglyceride (MCT) emulsion for conditions where MCTs are part of dietary management, such as long-chain fatty acid oxidation disorders or conditions managed by the ketogenic diet. Suitable for individuals 1 year of age and older and must be used under medical supervision. 50% MCT/50% water. Unflavored.

Microlipid[®]

Microlipid[®] is a 50% fat emulsion for use in oral and tube-feeding formulas. This 50% fat emulsion contains safflower oil - a source of polyunsaturated fat. Provides nutritional support for individuals with increased caloric requirements, decreased carbohydrate tolerance, fluid or volume restriction or require a ketogenic diet.

MCTprocal[®]

A medium chain triglycerides (MCT) based powder, containing a blend of carbohydrate and protein with a neutral taste. For the dietary management of disorders of long chain fatty acid oxidation, fat malabsorption, and other disorders requiring a high MCT, low long chain triglycerides (LCT) diet. MCTprocal is suitable from 3 years of age.
FOR USE UNDER MEDICAL SUPERVISION

Specialty Diet: Impaired GI Function

Vivonex[®]

Complete elemental nutrition with 100% free amino acids and 10% fat for those with severely impaired gastrointestinal function. Only 10% kcal from fat to support tolerance and reduce pancreatic stimulation. Useful in stressed, catabolic patients. Requires minimal digestive functionality for assimilation while providing benefits associated with continued use of the GI tract.

Tolerex[®]

This elemental formula contains 100% free amino acids and only 2% fat content for those with severely impaired gastrointestinal function. 100% free amino acid formula for severely compromised GI tracts. Can be used for tube feeding or oral supplementation.

Specialty Diet: Therapeutic Nutrition

Jevity[®] 1.5

JEVITY 1.5 CAL is calorically dense, fiber-fortified therapeutic nutrition that provides complete, balanced nutrition for long- or short-term tube feeding. For supplemental or sole-source nutrition. May be used for oral feeding of patients with altered taste perception. Use under medical supervision.

Osmolite[®] 1.5

OSMOLITE 1.5 CAL is therapeutic nutrition that provides complete, balanced nutrition for long- or short-term tube feeding for patients with increased calorie and protein needs, or for those with limited volume tolerance. For tube feeding. For supplemental or sole-source nutrition. Use under medical supervision.

Resource[®] 2.0

RESOURCE[®] 2.0 is a great tasting nutrient dense supplement providing 2.0kcal/mL. It is nutritionally formulated for the dietary management of individuals with unintended weight loss, malnutrition, for those requiring wound healing or are fluid restricted/volume sensitive. It can be used for medication round*, oral nutrition supplementation and enteral feeding following open system tube feeding guidelines. For oral and tube feeding use.

Specialty Diet: Keto

KetoVie® 4:1

KetoVie 4:1 Unflavored is a nutritionally complete ready-to-use liquid 4:1 ketogenic medical food with no artificial sweeteners or flavorings, 100% partially hydrolyzed whey protein and contains MCT.

Indicated for the dietary management of patients with intractable epilepsy and other disorders for individuals 1+ years that require a ketogenic diet for both oral and tube feeding.

Keto (Functional Formularies)

Functional Formularies Keto is the first and only organic, whole foods based ketogenic feeding tube formula and meal replacement. Packed with organic nourishment. Contains 610 calories from 12 Certified Organic, whole food, plant-based ingredients. Formulated at a perfectly balanced Keto ratio (84% fat, 4% carb, 12% protein). Utilizes peptides for enhanced digestion and maximum nourishment.

KetoCal® 4:1

A nutritionally complete, ready-to-feed ketogenic formula in a 4:1 ratio (fat:carbohydrate + protein).

A medical food suitable for individuals over 1 year of age and must be used under medical supervision. Provides a consistent ketogenic ratio of 4:1 fat to carbohydrate + protein regardless of amount consumed. Contains DHA, ARA, and a multi-fiber blend. Liquid format allows for easy tube feeding.

Specialty Diet: Glycogen Storage Disease

Glycosade®

A hydrothermally processed high amylopectin cornstarch. For use in the dietary management of hepatic Glycogen Storage Diseases (GSD) where the use of a long acting cornstarch is indicated.

Glycosade is suitable from 5 years of age.

Glycosade can be taken as a drink or given as a bolus via feeding tube

Specialty Diet: Kidney Disease

Renastart[®]

A powdered formula with low levels of protein, calcium, chloride, potassium, phosphorus and vitamin A for the dietary management of pediatric kidney disease.

Renastart is suitable from 1 year of age.

FOR USE UNDER MEDICAL SUPERVISION

Suplena[®]

Therapeutic nutrition specifically designed for nondialyzed people with chronic kidney disease and on a protein-restricted diet without protein-energy wasting (malnutrition). For tube or oral feeding. For supplemental or sole-source nutrition. Use under medical supervision.
